COSA
Assignment-8

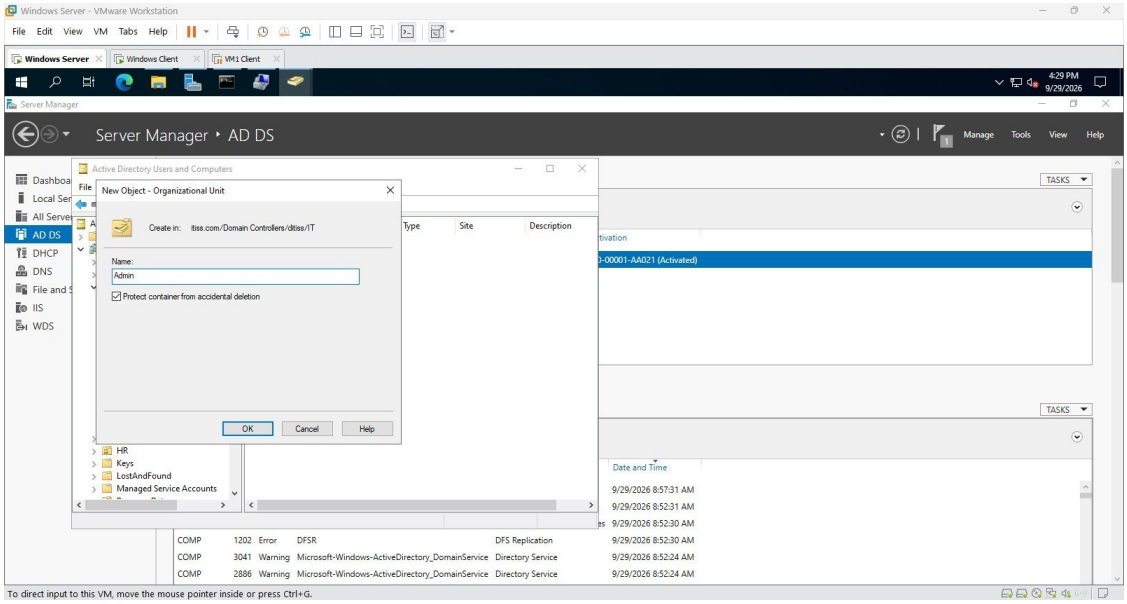

1. Create the Organizational Units
- Create three top-level OUs directly under ditiss.com: HR, Finance, and IT.

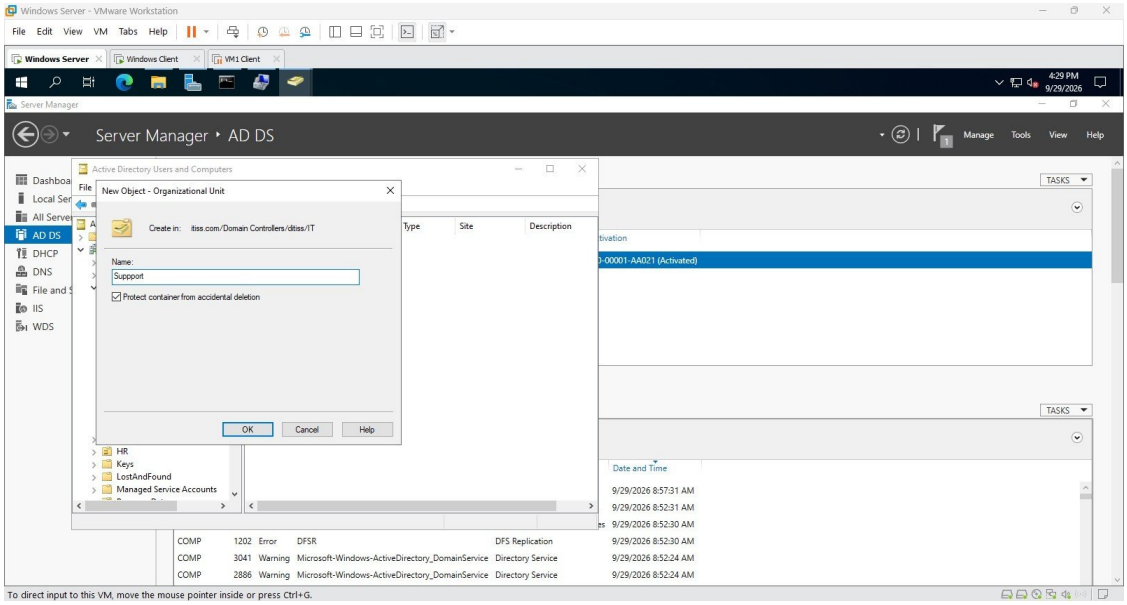

- Inside the IT OU, create two child OUs: Admin and Support.

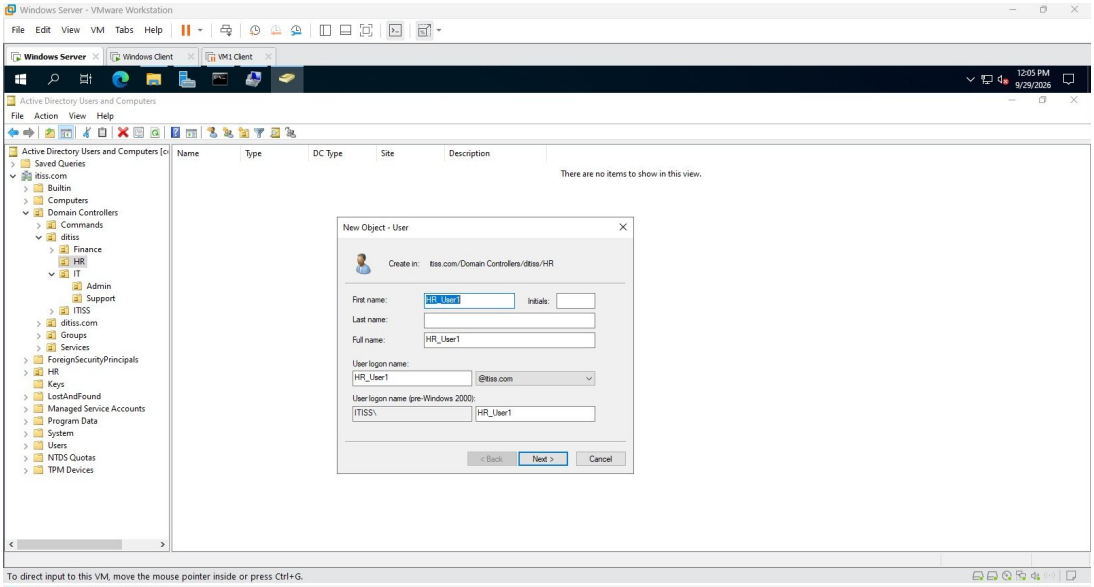

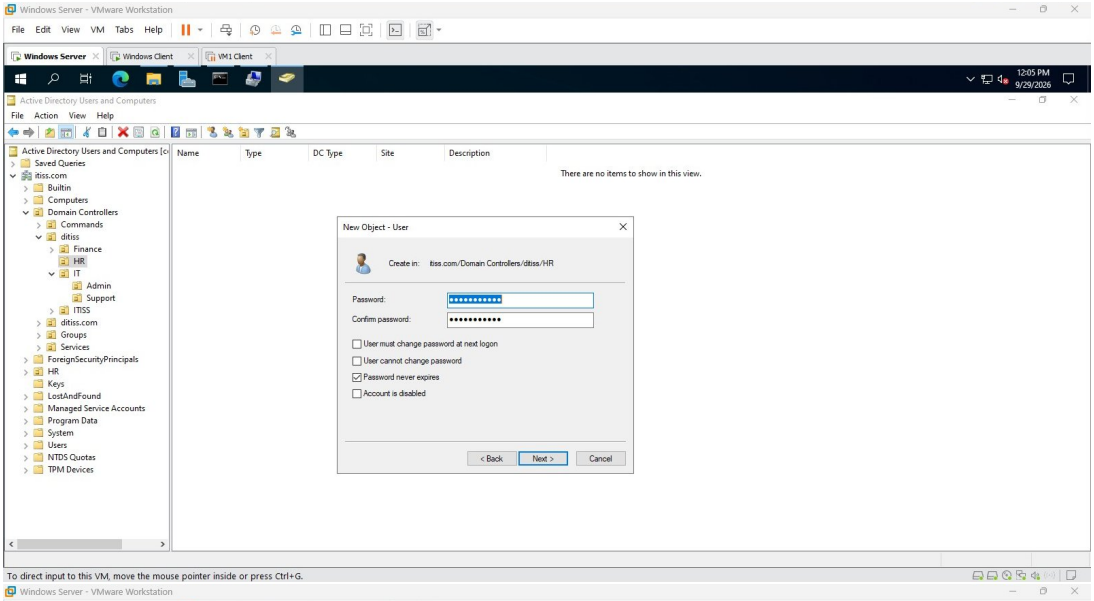

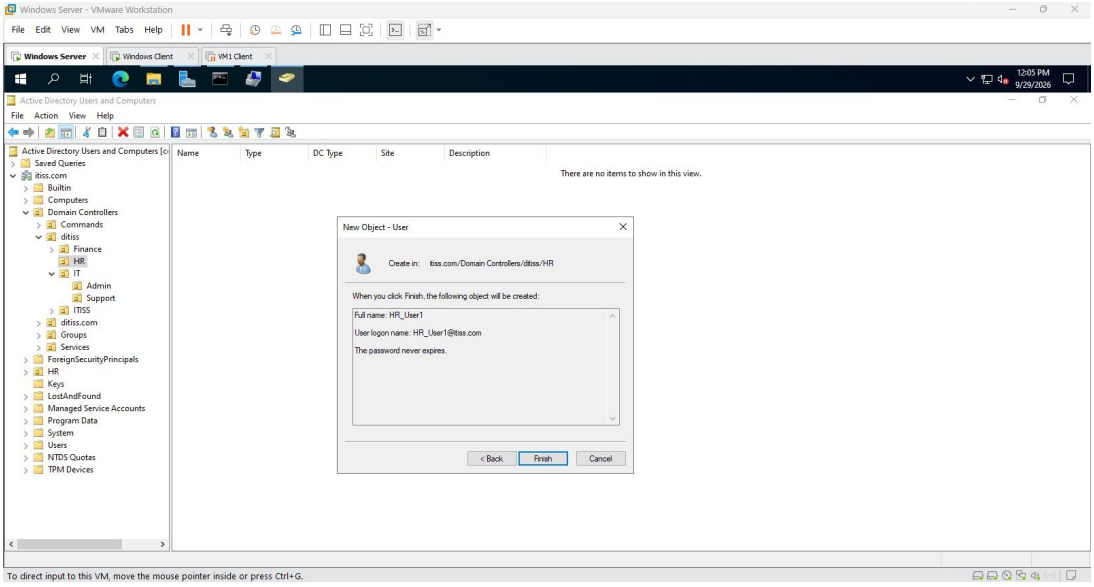

2. Create User Accounts

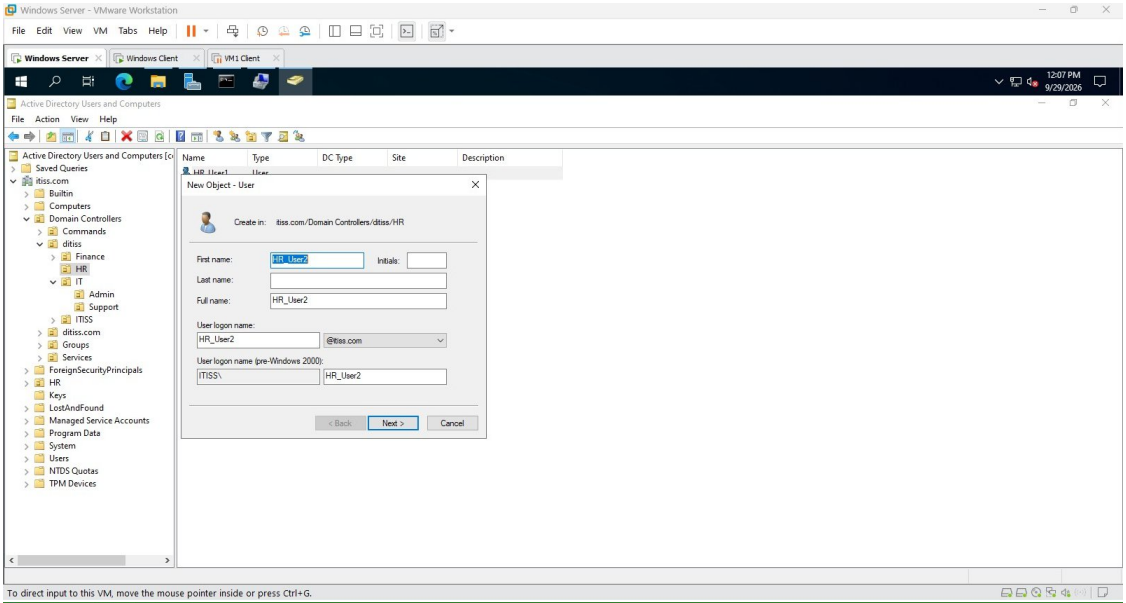

- Create the following users and place them in the exact OUs shown above. Use these simple passwords: Pa$$w0rd123

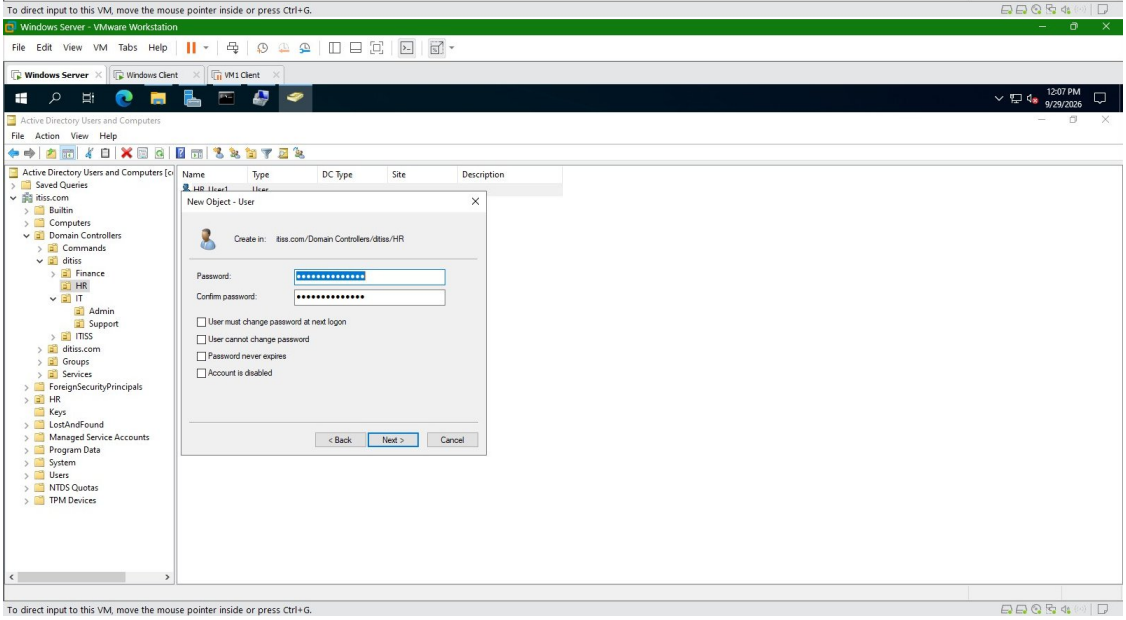

• HR_User1, HR_User2 → OU=HR

• IT_Admin1 → OU=IT\Admin

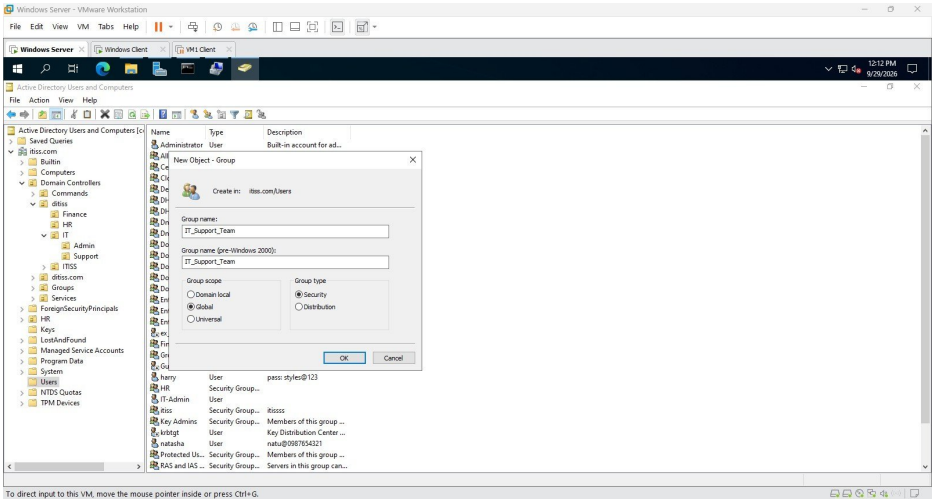

• Support_User1 → OU=IT\Support

3. Create the Security Group

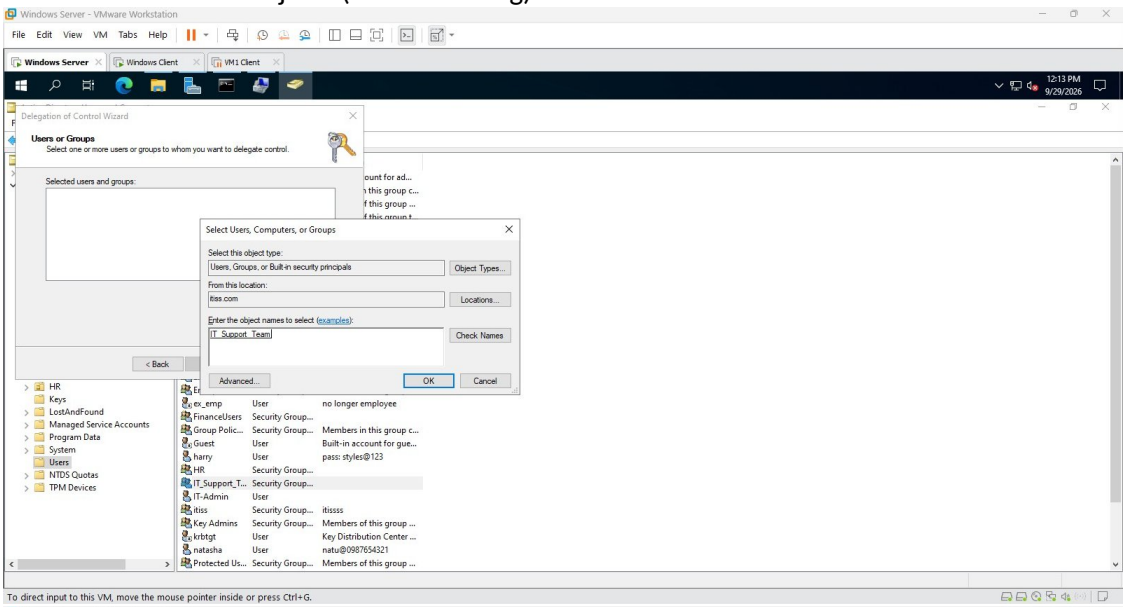

- Create a Global Security Group named IT_Support_Team (place it in the default Users container or create a new “Groups” OU if you want to be extra organized).

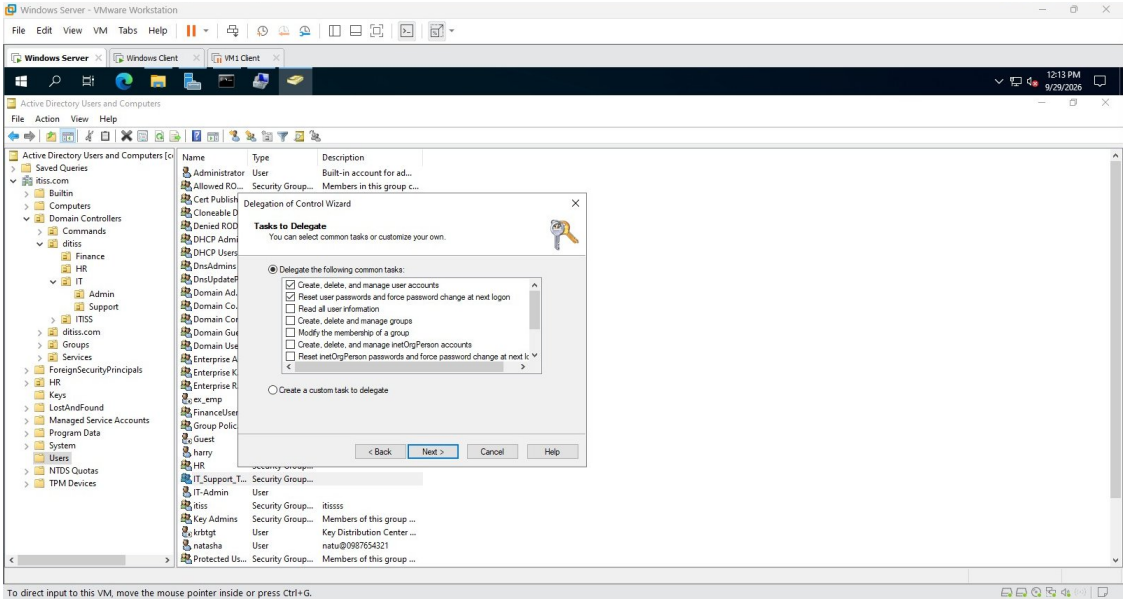

4. Delegate Control

Using the Delegation of Control Wizard on the IT OU:

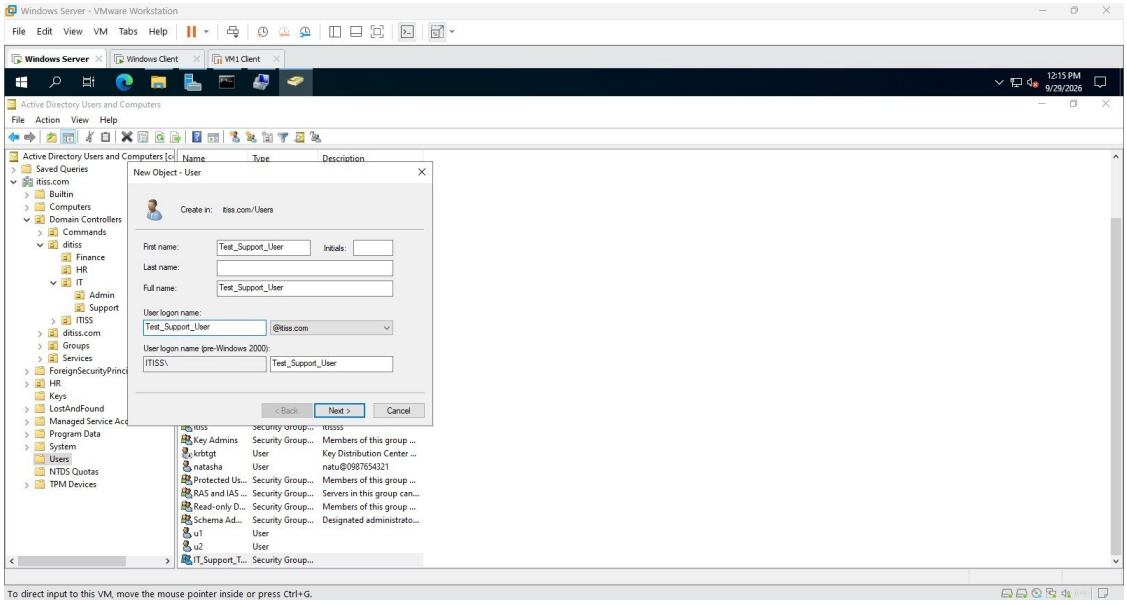

- Delegate to the group IT_Support_Team.
- Grant only these two permissions (choose the predefined tasks):
- “Reset user passwords and force password change at next logon”
- “Create, delete, and manage user accounts”
- Make sure the delegation applies to this folder, existing objects in this folder, and creation of new objects (default setting).

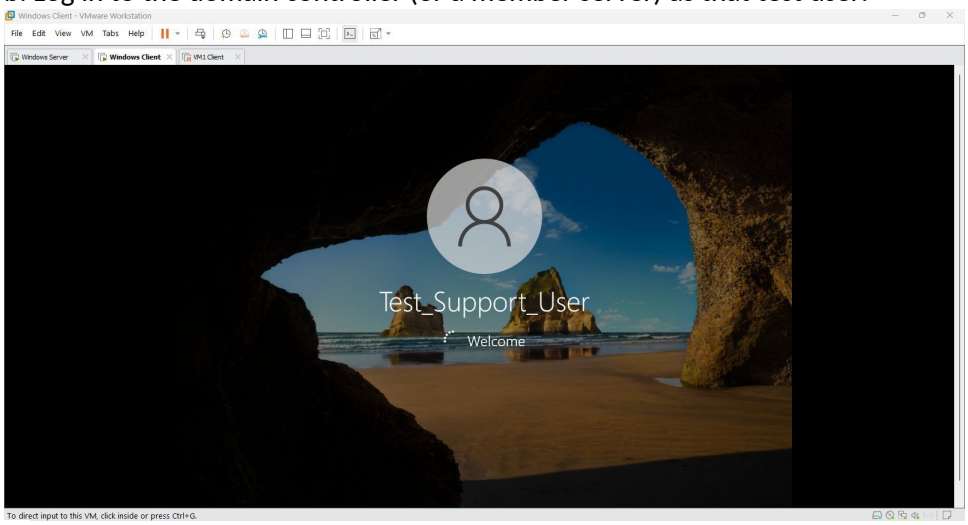

5. Verification All:

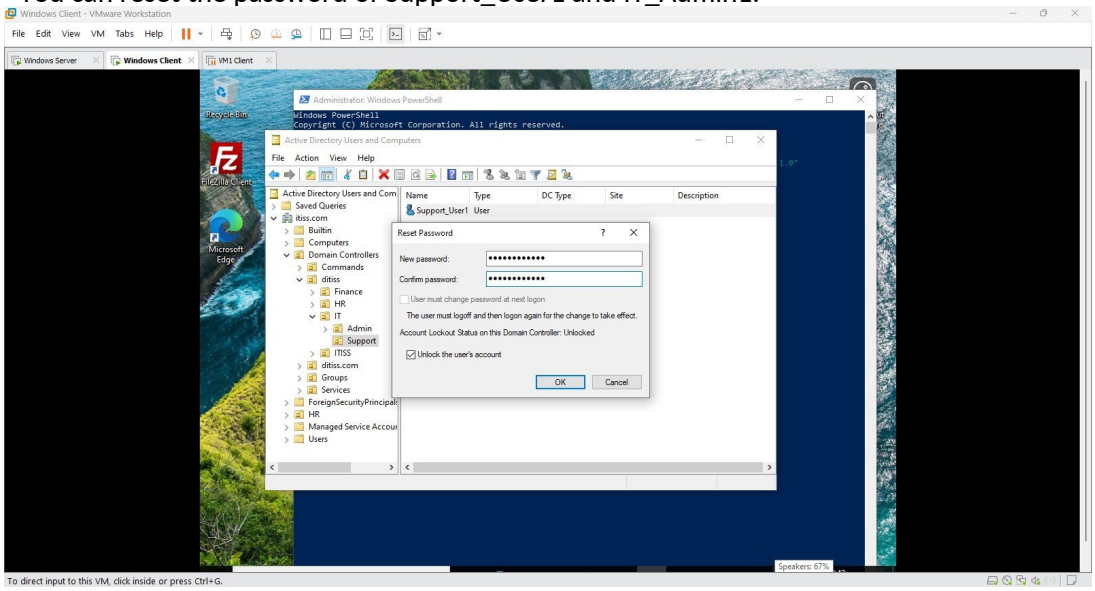

a. Add one test user (e.g., Test_Support_User) to the IT_Support_Team group.

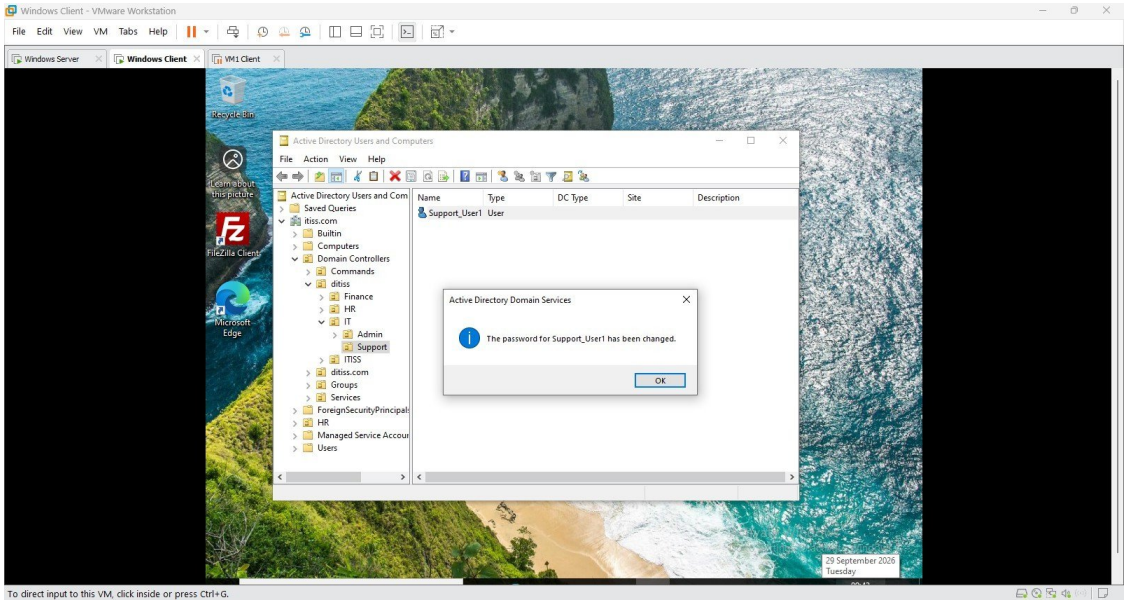

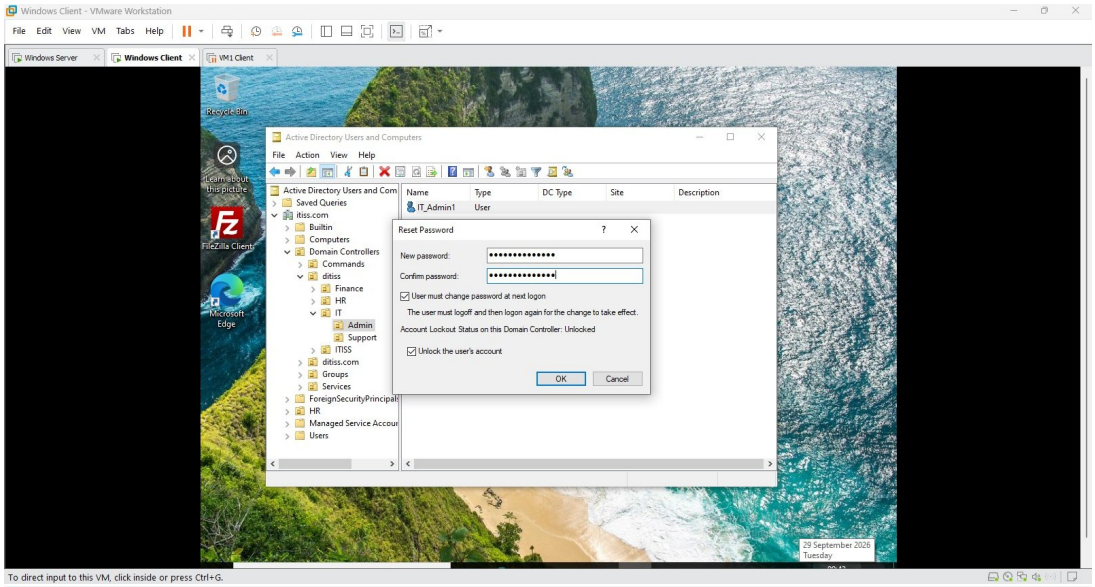

b. Log in to the domain controller (or a member server) as that test user.

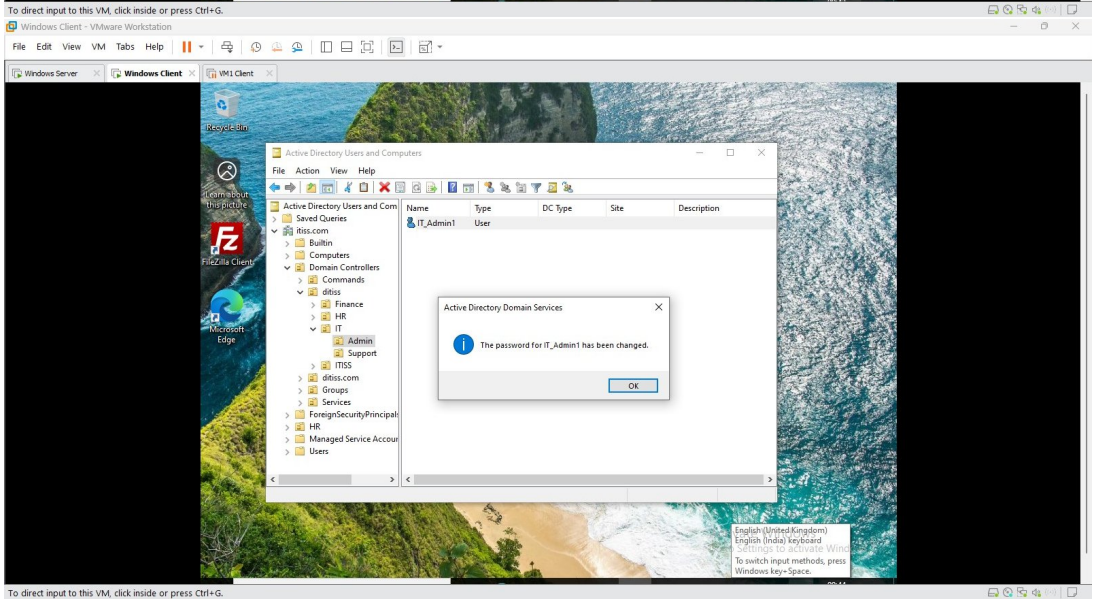

c. Open Active Directory Users and Computers as the test user and confirm:
- You can reset the password of Support_User1 and IT_Admin1.

To direct input to this VM, click inside or press Ctrl+G.

- You can create a new user inside the IT\Support OU.

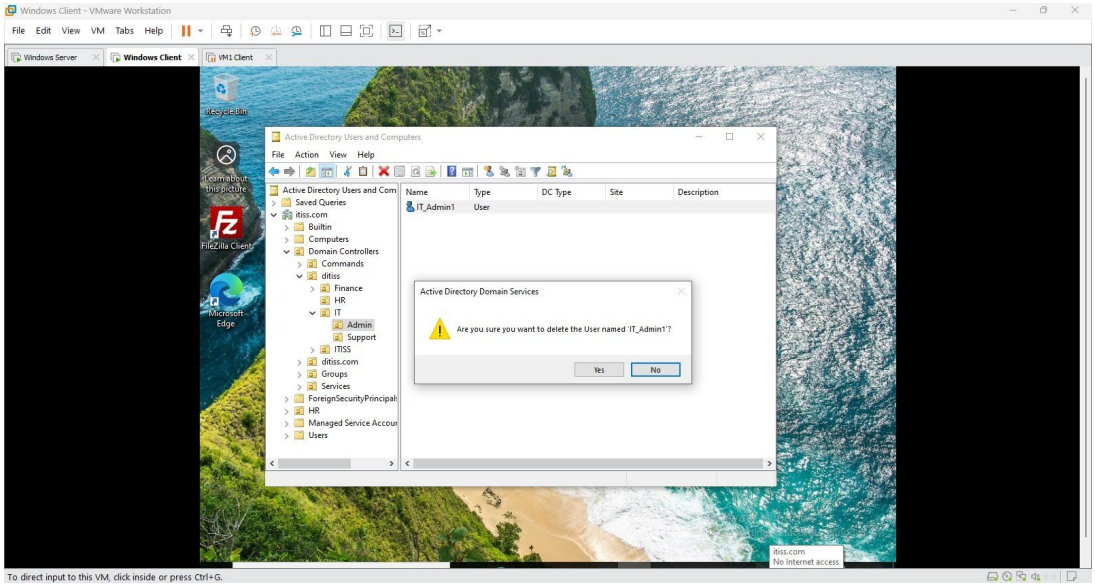

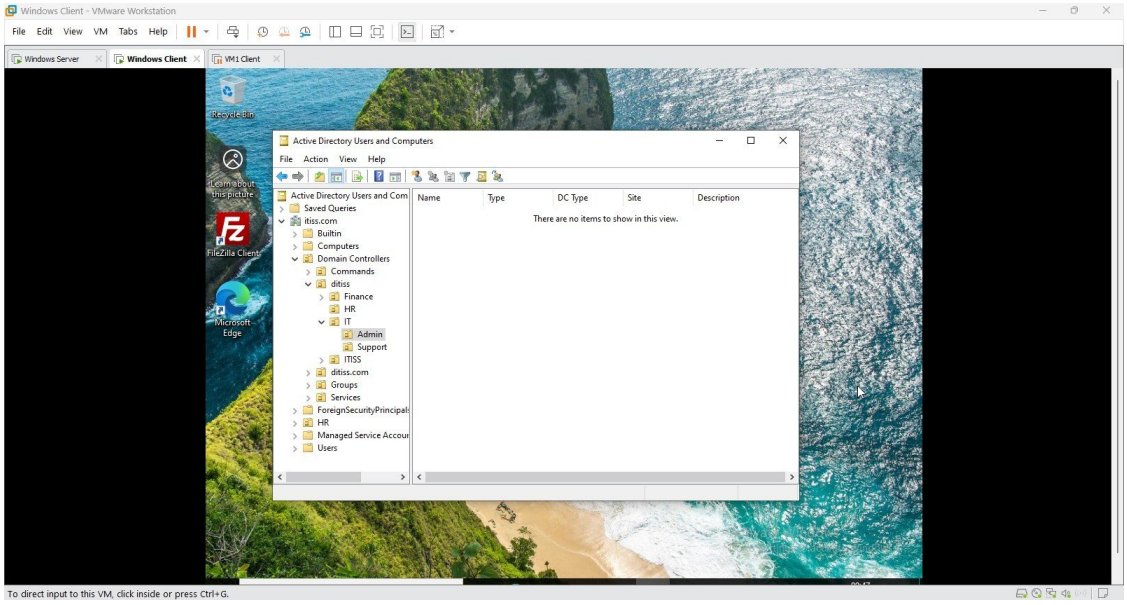

- You cannot create users or reset passwords in HR or Finance OUs (this proves delegation is scoped correctly).

d. Try to delete or modify IT_Admin1 — you should be able to (because it's inside the delegated IT
OU).

6. After completing the above, move HR_User1 from the HR OU into the IT\Support OU temporarily, then move it back
